

# Hammer Mill

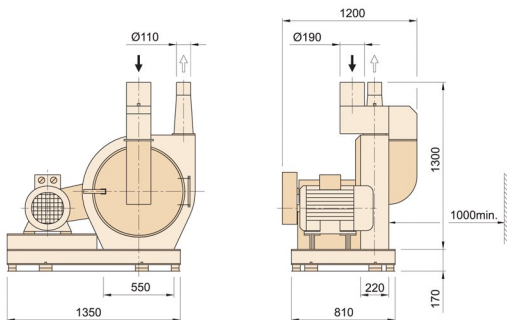

## AMHM

### Function:

- Grinding all kinds of cereals and bran extracted from cleaning section, applicable in flour and feed mills.

### Main Features:

- Possessing a specially designed blowing rotor equipped with a strong fan, which transfers grinded materials to the silos pneumatically.
- The blades of the rotor are made of heat treated steel.
- Power transmission from the electromotor to the rotor is done via a two-bearing housing, belt, and pulley.
- Sections of the machine exposed to friction are made of antifriction coated steel.
