

Rotary Separator

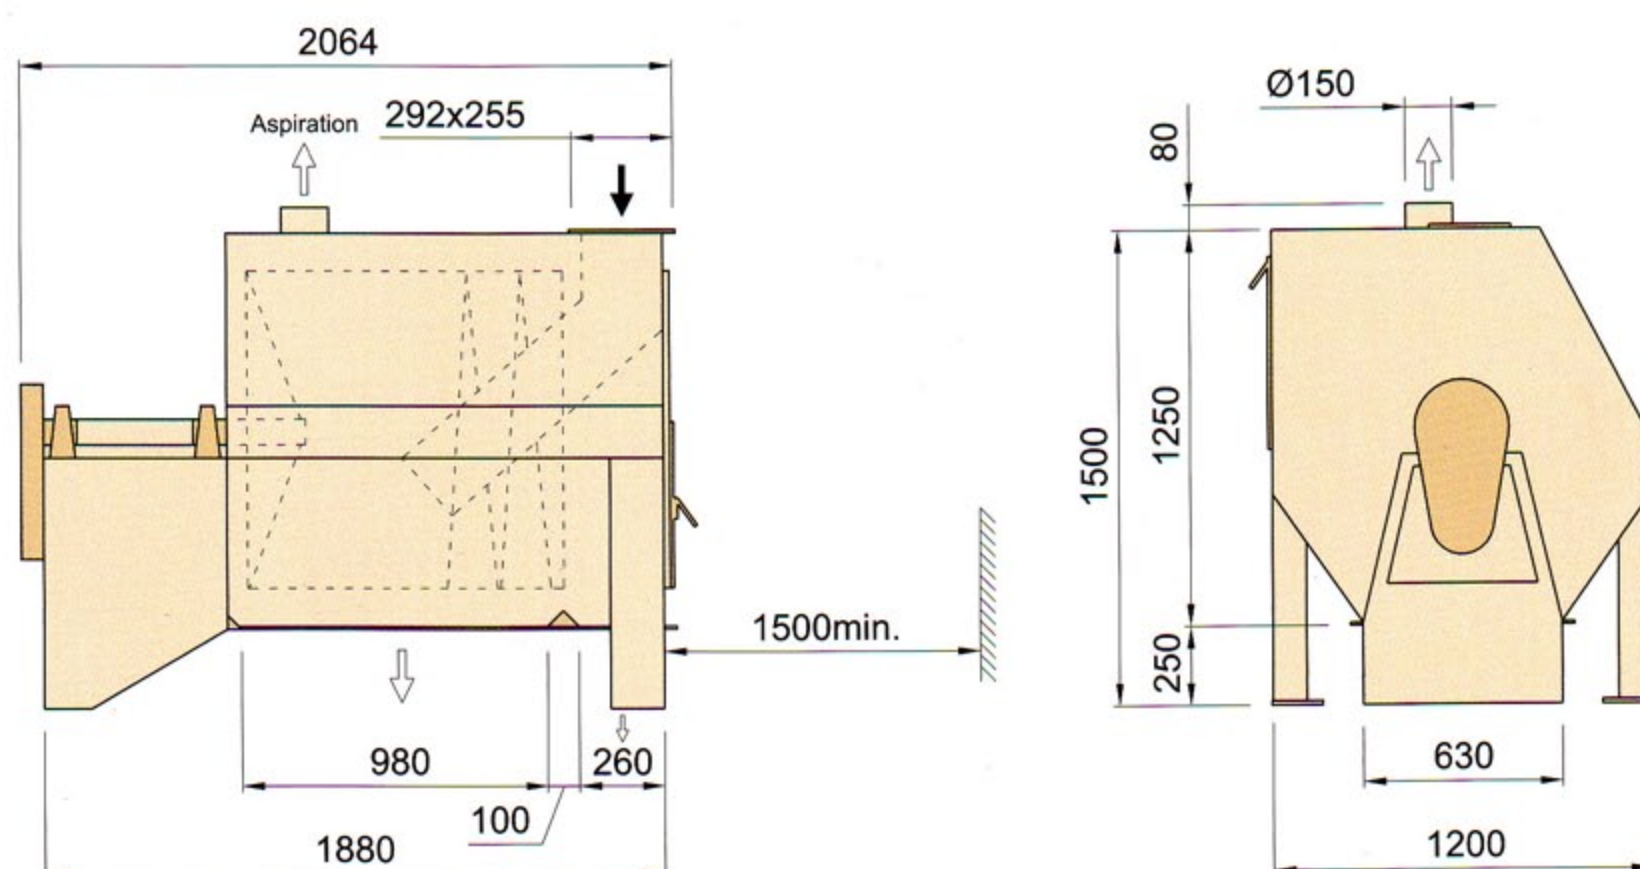

AMRS

Function:

- Cleaning granular and flourey bulk material from coarse impurities such as straw particles, pieces of wood, etc. in pre-cleaning section.

Main Features:

- Having firm steel structure and bearing arrangement.
- Employing a rotating cylinder made of special perforated sheets.
- A pipe is employed on the top of the machine for sucking dust when the machine is operating.
- High Capacity
- The spiral shape of inside part of the rotating cylinder allows the impurities to be discharged smoothly.

Ard Machine Rotary Separator

Type	Capacity max. [t/h]	Motor (50 Hz) [kW]	Aspiration [m³/min]	Net weight [kg]	Shipping volume [m³]
AMRS 100/100	100	0.75	20	850	4.9

- The geared motor also operates utilizing power supply of 60 Hz.
